DOMAINS

SaaS · CRM · FinTech · PropTech · AI products

RECOGNITION

MEIRA Award (Middle East)

CORE EXPERTISE

Product & UX Design
User-centred design, user flows, UX audits, usability testing, web and mobile UI, interaction design

Design Systems
Component libraries, design tokens, interface consistency, Figma prototyping, developer handoff

Arabic & RTL Design
Bilingual Arabic/English layouts, Arabic typography, localised numerals and currency

AI-Assisted Design
Figma automation via MCP, AI prototyping and exploration workflows

EDUCATION

Bachelor in Fine Art (Illustration)
University of the Punjab, Lahore
2009 – 2013

PROFILE

Senior Product & UI/UX Designer with 7+ years designing web and mobile products for SaaS, CRM, FinTech and PropTech. Builds design systems that keep products consistent and shorten design-to-development handoff, leads UX audits and usability testing, and turns analytics and user feedback into clearer flows. Experienced with bilingual Arabic/English (RTL) interfaces and AI-assisted Figma workflows. Worked across 8+ major client projects at LAVA Brands, including award-winning annual report websites.

EXPERIENCE

LAVA Brands
Dubai-based agency, Lahore office · concurrent with Frontier Labs

Senior Product Designer
Jul 2024 – Jan 2026

- Led UI/UX for client-facing digital products and annual report websites; reported a 45% improvement in user engagement.
- Developed reusable component libraries and design systems, reducing design-to-development handoff time by 30%.
- Collaborated with stakeholders, developers, and cross-functional teams across 8+ major client projects.

Frontier Labs
Lahore, Pakistan

Senior UX/UI Designer
May 2023 – Aug 2026

- Led redesigns of core website user flows using product analytics and user feedback.
- Conducted UX audits, resolved usability issues, and improved the quality of user experiences.
- Developed and maintained a design system for web and mobile interfaces.

UX/UI Designer
Feb 2021 – May 2023

- Redesigned key website user flows using analytics and user feedback to improve usability.
- Audited user journeys and contributed to reusable design patterns across web and mobile products.

Logicon
Lahore, Pakistan

User Interface Designer
Jul 2019 – Jan 2021

- Redesigned mobile application interfaces and lead-generation forms, using A/B testing to improve engagement.
- Conducted usability testing with more than 25 participants to uncover friction and refine user flows.
- Created interactive Figma prototypes for stakeholder reviews and design approval.

SELECTED PROJECTS

HappyTenant — Tenant & Landlord apps

LAVA Brands · PropTech · Case study ↗

End-to-end redesign of both sides of an established residential PropTech platform. Tenant app: unified payments, bookings, service requests, documents and visitors into one coherent self-service experience. Landlord app: restructured a dense product around financial clarity, visible approvals and overdue work orders, and consistent portfolio drill-downs.

Heard — Restaurant ordering app

Frontier Labs · iOS & Android · Case study ↗

Consumer ordering app with three fulfilment modes (delivery, pickup, table order) sharing one cart-to-payment flow. Redesigned the home into a mode grid with nearby discovery, and delivered Figma + Zeplin handoff for iOS and Android engineering.

Danat Behaviors — Behavior & Rewards

Freelance · HealthTech · Case study ↗

Zero-to-one mobile experience connecting challenges, points, recognition and partner rewards.

Wanderly — AI Travel Planner

Freelance · AI product · Case study ↗

AI-assisted travel planning that turns travel intent into structured, comparable trip experiences (20-day mobile prototype).

NHR — Nozul Hospitality App

Freelance · Hospitality · Case study ↗

Mobile app for dining discovery, table and event booking, and stay reservations.

Nozul Hotels

Freelance · Hospitality · Case study ↗

Hospitality website concept for multi-service discovery, reservation intent and brand storytelling.

Skrewww Design System

Personal project · skrewww.com

AI-first, multi-industry design system in Figma and React/TypeScript/Next.js: 63 components, 5 shape and 3 surface styles, 8 industry kits, Figma-to-React token parity. Owned system design and architecture end to end, using AI to accelerate the build. Free on Figma Community, Pro edition on Gumroad.
